EUROPE / SPAIN RELOCATION

Open to relocation across Spain and Europe for suitable opportunities with employer-sponsored work visa and relocation support. Interested in Entry-Level Software / IT Professional with experience in web development, AI-integrated applications, databases, and IT systems.

PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in software and web development, administrative works, data handling, and use of artificial intelligence through a 500-hour internship. Proficient in Python, JavaScript, Next.js, HTML5, CSS3, React Native, Git/Github, SQL and Jira, with practical experience building web-based management systems and AI-Integrated Applications. Strong interest in developing efficient digital solutions and growing within an international technology environment.

TECHNICAL SKILLS

- | | |
|---|--|
| •Programming: Python, JavaScript | AI & Data: AI Integration, Data Analysis, Machine Learning, TensorFlow/Keras |
| •Web Development: Next.js, React, HTML5, CSS3 | Tools: Git, GitHub, Jira |
| •Mobile Development: React Native | |
| •Database: SQL, Database Management | |
-

INTERNSHIP EXPERIENCE - 500 HOURS

ADMINISTRATIVE / SYSTEM INTERN - QUEZON NATIONAL HIGH SCHOOL

- Developed a Web-Based Health Monitoring System to manage employee and student health records, digital health visits, reporting and data analysis.
 - Digitalized administrative processes by assisting in the preparation, verification and organization of PhilHealth, SALN, Personal Data Sheets(PDS) and ITR Documentation.
 - Maintained confidential personnel records, verified official documents and ensured accurate filing to support efficient daily administrative operations.
-

PROJECTS

- Nexus Personal OS - Personal productivity platform built with Next.js, React, JavaScript and SQL.
 - Roamly Airbnb - Web-based accommodation platform built with Next.js, React, and MongoDB.
 - IT Cafe - E-Commerce web application built with HTML5, Django and Python.
 - Automated Inventory Management System - Integrated AI-powered facial analysis using TensorFlow/Keras, trained machine learning models on thousands of image samples to classify five skin categories: oily, dry, normal, wrinkle, and acne.
 - Lifeline Mobile App - Mobile application for self-emergency situations built with React Native.
-

EDUCATION

- Bachelor of Science in Information Technology** - Dalubhasaan ng Lungsod ng Lucena | 2026
 - Science, Technology, Engineering and Mathematics Strand** - Tayabas Western Academy | 2022
-

CERTIFICATIONS AND SEMINARS

- Cisco - Introduction to Modern AI
- Cisco - Introduction to Data Science
- Cisco - Introduction to Cyber Security
- Cisco - Networking Basics
- Cisco - Ethical Hacking
- UNITE 2025 - IT Seminar
- Introduction to Artificial Intelligence

LANGUAGES

English: B2 - Upper Intermediate / Professional Working Proficiency
Spanish: A1- Basic (Still Learning)
Mandarin : A2 - Elementary
